Subject: Huron Church Protest & Ambassador Bridge Corp.

Hi Murph, I just received another call from [REDACTED] (President of Ambassador Bridge Corp.). In short, he's frustrated, and seeking an explanation as to how we're responding to this protest situation on the Canadian side of the bridge. He's also seeking info regarding the potential duration of this protest, as commercial traffic is already being re-routed away from the Detroit bridge crossing. Obviously, I advised [REDACTED] that we were in fact responding to the situation, and had up 4 Sgts. and several Patrol Officers assigned to the scene. I further advised [REDACTED] that we had several Sr. Officers monitoring and responding to this situation.

[REDACTED] subsequently advised me that today should be considered a "light" day for truck traffic, as the flow will increase over the course of the next couple of days to 5,500+ commercial vehs/day (i.e. Mon - 3500/day, Tue - 4500/day, then Wed, Thur & Fri - 5500/day. These are the recorded avgs. To put it simply, [REDACTED] wanted to know how we were going to deal with nearly double the flow, when we were apparently having difficulty dealing with a normally light day of commercial traffic. Obviously, he's frustrated with the situation and simply seeking answers and info.

In final, [REDACTED] has requested to be called tomorrow morning, as he would like an update on the situation, and what the WPS plans to do if this situation becomes a prolonged one. I advised him that I would contact him in the morning, and that I would forward his immediate concerns to my superiors. I will obviously wait on further direction from you and Karel, before speaking further with [REDACTED] or q designate from the Bridge Corp.

Regards,
GW
